

Olesia Pryhun

Junior front-end developer

PORTFOLIO

My detailed portfolio with pet projects: <https://pryhun.me>.

My **last project**: fake online shop with a local Next.js API, connected to MongoDB.

ABOUT ME

I finished a front-end course, then I continued my studies **with a mentor** (experienced web developer). He provided me with support and guidance throughout the whole process.

I learned through **building projects**, making mistakes and fixing them. I used all tools possible: from docs and forums to YouTube and chatGPT.

SKILLS

Front-end:

- Next.js
- React
- Redux
- Bootstrap
- Sass/Scss
- Java Script
- CSS
